

## **REMARKS/ARGUMENTS**

Reconsideration and withdrawal of the rejections of the application are respectfully requested in view of the amendments and remarks herewith, which place the application into condition for allowance. The present amendment is being made to facilitate prosecution of the application.

### **I. STATUS OF THE CLAIMS AND FORMAL MATTERS**

Claims 2-7 and 32-37 are pending in this application. Claims 2, 4, 6, 32, 34 and 36, which are independent, are hereby amended. Claims 1, 8-31, and 38-53 have been canceled without prejudice or disclaimer of subject matter. No new matter has been introduced by this amendment. Support for this amendment is provided throughout the Specification. Changes to claims are not made for the purpose of patentability within the meaning of 35 U.S.C. §101, §102, §103, or §112. Rather, these changes are made simply for clarification and to round out the scope of protection to which the Applicants are entitled.

### **II. REJECTIONS UNDER 35 U.S.C. §102(e)**

Claims 2, 4, 6, and 32, 34, and 36 were rejected under 35 U.S.C. §102(e) as allegedly anticipated by U.S. Patent No. 6,301,845 to Milanian, et al.

### **III. REJECTIONS UNDER 35 U.S.C. §103(a)**

Claims 3, 5, 7, 33, 35, and 37 were rejected under 35 U.S.C. §103(a) as allegedly unpatentable over U.S. Patent No. 6,301,845 to Milanian, et al. in view of U.S. Patent No. 5,654,746 to McMullen, et al.

#### IV. RESPONSE TO 35 U.S.C. §102 REJECTIONS

Claim 2, recites, *inter alia*:

“...motion data generating means for generating motion data for controlling motion, which is felt by a user, corresponding to an image in accordance with said image data input via said input means,

wherein the motion data is generated as a function of a plurality of motion vectors detected in the image data...”  
(Emphasis Added)

As understood by Applicants, U.S. Patent No. 6,301,845 to Milanian, et al. (hereinafter, merely “Milanian”) relates to an amusement and virtual reality ride, and more particularly to a method and apparatus for enacting a ship at sea, the ship impacting an iceberg, and the ship sinking after impacting the iceberg. The ride may also include an enactment of an underwater ride to the sunken ship. The method may further include an enactment of a dive through the ocean and a view of the sunken ship resting on the sea bottom.

Applicants submit that nothing has been found in Milanian that would disclose or suggest the above-identified features of claim 2. Specifically, Applicants submit that Milanian fails to teach or suggest motion data generating means for generating motion data for controlling motion, which is felt by a user, corresponding to an image in accordance with said image data input via said input means, wherein the motion data is generated as a function of a plurality of motion vectors detected in the image data, as recited in claim 2.

Therefore, claim 2 is patentable.

Applicants submit that McMullen, et al. does not provide the disclosure missing in Milanian.

For reasons similar to those described above, independent claims 4, 6, 32, 34, and 36 are also patentable.

## **V. DEPENDENT CLAIMS**

The other claims in this application are each dependent from one of the independent claims discussed above and are therefore believed patentable for at least the same reasons. Since each dependent claim is also deemed to define an additional aspect of the invention, however, the individual reconsideration of the patentability of each on its own merits is respectfully requested.

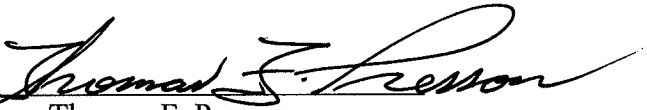

## **CONCLUSION**

In the event the Examiner disagrees with any of statements appearing above with respect to the disclosure in the cited references, it is respectfully requested that the Examiner specifically indicate the portion, or portions, of the reference, or references, providing the basis for a contrary view.

In view of the foregoing amendments and remarks, it is believed that all of the claims in this application are patentable and Applicants respectfully request early passage to issue of the present application.

Please charge any additional fees that may be needed, and credit any  
overpayment, to our Deposit Account No. 50-0320.

Respectfully submitted,
